

Environmental Policy Declaration

As part of the Corporate Social Responsibility of SUSS MicroTec, sustainable developments, environmental protection, the health and safety of our employees and of our customers as well as the wellbeing of the society as a whole has always been a cornerstone in our activities.

Environmental Policy

Environmental responsibility and sustainability are values of its own right and an integral part in our operations. Our activities are aligned according to these values to achieve sustainable developments. Besides others, the SÜSS MicroTec AG, the SUSS MicroTec Lithography GmbH and the SUSS MicroTec Photomask Equipment GmbH & Co. KG have adopted the ISO 14001 as guideline for their activities and are continuously monitoring and improving processes and their results. Our commitments include:

- Legal and Comprehensive Requirements

All applicable statutory and regulatory requirements are observed and fulfilled. Required permits are obtained, maintained and kept current and their operational, reporting and recording requirements are followed. The SUSS Codes for Corporate Governance are applied.

- Resource Conservation

Production, Operations and Facility Management are encouraged to reduce or eliminate waste generation and energy usage by adjusting or modifying production, maintenance and facility processes, materials substitution, recycling or re-use of materials.

Research & Development and Engineering Departments are adopting resource conservation guidelines concerning conservation of energy, utilities and materials of our products.

- Hazardous Materials

Hazardous production or process materials, chemicals, media and other materials posing potential hazards are identified and managed to ensure their safe handling, transport, storage, use, recycling or reuse and disposal. Applicable laws, regulations and customer requirements regarding prohibition or restriction of specific substances are applied.

- Waste Management

Solid waste and wastewater generated by our operations and processes are to be characterized, controlled or treated as required prior to discharge or disposal.

- Air Emissions

Gaseous solvents, corrosives, ozone depleting fluids or other harmful materials generated by operations are controlled or treated as required by applicable regulations.

- Supply Chain

Applicable procedures and requirements concerning environmental responsibility and sustainability are communicated to relevant suppliers and subcontractors.
