

Berenberg European Conference, London

SUSS Investor Presentation

December 1, 2025

Company Overview

SUSS at a glance

- Hidden champion headquartered in Germany with 75 years track record of innovation and growth
- Key technology provider for semiconductor frontend and advanced backend industry, benefiting from structural growth drivers such as Artificial Intelligence
- Global customer base with largest share of business in Asia
- Strategic partner for global semiconductor IDMs and foundries
- Innovator with relevant network to research institutes and universities

SUSS is part of our digital life!

Milestones in our company's history

1949

Company founded as Karl Süß KG in Munich

1990

Volume production of wafer bonder starts

2000

Coating systems added through acquisition of Fairchild Technologies

2010

Second German site established after acquisition of Hamatech APE

2020

Inkjet printing added to coating expertise through acquisition of PiXDRO

2024

Relaunch of the brand as SUSS

1963

World's first mask aligner SUSS MJB3 developed

1999

Initial Public Offering at the Frankfurt Stock Exchange completed

2001

Company renamed to SUSS MicroTec

2012

Laser processing technology taken over from newly acquired Tamarack Scientific

2020

Asian production site opened in Hsinchu/Taiwan

2025

Opening of new and larger site in Zhubei/Taiwan

■ Company Milestones ■ Technology Milestones

Management Board of SUSS MicroTec SE

CFO

Advanced Backend Solutions

Portfolio Highlights – Bonding Systems

SUSS is market leader for temporary bonding and de-bonding solutions and complements the portfolio with permanent & hybrid bonding equipment.

SUSS hybrid bonding solutions – understanding customer's needs

Wafer-to-wafer HB XBS300 W2W

Product launched: 10/2022
Target customers: HVM

Die-to-wafer/wafer-to-wafer HB XBC300 Gen2 D2W/W2W

Product launched: 05/2024
Target customers: Research
institutes, R&D teams of HVM

Die-to-wafer HB XBC300 Gen2 D2W

Product launched: 5/2025
Target customers: HVM

We optimize our product solutions to serve our customer's device and manufacturing needs.

HBM roadmap enables SUSS to grow in existing and new markets

in € million	HBM3E	HBM4	HBM4E	HBM5
Expected SOP	2024	2026	2026 or 2027	2027 or 2028
# of DRAM layer acc. to JEDEC	8/12	12	16	16/20
Bonding type in DRAM stack	TCB	TCB	TCB and HB	HB
Thinning of DRAM devices	TBDB	TBDB	TBDB	TBDB

Relevance for SUSS:

1

TBDB remains a crucial process for thinning of DRAM devices used in HBM cube

Growth of existing SUSS TBDB business in line with general HBM market growth

2

Increase of layer number in HBM cube triggers more TBDB capacity for thinning of DRAM devices

Additional growth of SUSS TBDB business in line with higher layer in HBM cube

3

Hybrid bonding will gradually replace Thermal Compression bonding for stacking of DRAM devices

Expansion into this market offers new growth opportunities with SUSS HB solutions

TCB: Thermal compression bonding, HB: hybrid bonding, TBDB: Temporary bonding & de-bonding

2.5/3D Chiplet Technology | SUSS well positioned to benefit from the strong momentum in 2.5D and 3D evolution

Temporary Bonding

- **HBM:** Structural support during thinning

Hybrid Bonding

- **HBM:** Stacking of DRAMs¹
- **CPO:** Stacking of PIC & EIC¹
- **SoIC:** E.g., Logic-on-Logic¹

Inkjet-/Spin Coating

- **TIV:** Lithography
- **RDL:** Lithography¹

UV-Scanner (Exposure)

- **TIV:** Lithography
- **RDL:** Lithography¹

Photomask Cleaning (Frontend)

- **HBM:** Mask Cleaning in DRAM manufacturing
- **SoIC:** Mask Cleaning in Logic manufacturing

Wafer Cleaning

- **HBM:** Critical material removal and final cleaning in Backend manufacturing¹

¹ Potential future use case

New production site in Zhubei officially opened

New production site in Zhubei has officially opened on October 30, with more than > 100 guests including high-level customers.

Zhubei project progress

- Technical installations and interior outfitting completed; all necessary licenses have been obtained
- Construction of the first tools at the new location has begun; first deliveries of tools produced in Zhubei in early 2026
- Leasing contracts for old locations terminated by the end of Q1 2026 at the latest

Financials 2025

Very solid sales development, order momentum slow, gross profit and EBIT margin clearly below expectations

Segment Overview 9M 2025

Advanced Backend Solutions

in € million	9M 2025	9M 2024
Order intake	182.5	198.1
Order book as of September 30	187.3	274.2
Sales	262.9	208.8
Gross profit	90.1	86.8
Gross profit margin	34.3%	41.6%
EBIT	26.6	33.3
EBIT margin	10.1%	15.9%

- Order intake below previous year as strong demand for coaters could not fully compensate for the decline in orders for bonders; demand for Imaging systems with a slight increase thanks to CoWoS-related orders for our UV scanner
- Sales growth of 25.9% in the first three quarters of 2025, to which all three product lines contributed; Imaging and Coating systems with exceptional year-on-year growth rates (both > +50%); Bonding systems still showing slight sales growth despite very strong previous year
- Gross profit margin burdened by unfavorable product mix, one-off effects and – in the third quarter – lower fixed cost coverage due to reduced total output

Photomask Solutions

in € million	9M 2025	9M 2024
Order intake	54.3	78.1
Order book	88.9	156.7
Sales	121.5	86.5
Gross profit	46.7	30.6
Gross profit margin	38.4%	35.4%
EBIT	32.0	17.9
EBIT margin	26.3%	20.7%

- With order intake of €7.6 million in the third quarter, this is now the second quarter in a row with weak order momentum; orders from Chinese customers down €32 million year-on-year after nine months
- Strong sales growth of 40.5 % in the first three quarters, mostly driven by an exceptional H1 while Q3 sales of €25.2 were slightly below previous year
- Year-on-year gross margin development very positive, even though the third quarter showed a weaker trend at 31.7% due to an unfavorable customer mix and a rather low sales volume

Strong sales growth and higher investments

in € million

	9M 2025	9M 2024	Change
Order intake	236.8	276.2	-14.3%
Order book as of September 30	276.1	430.8	- 35.9%
Sales	384.4	295.3	+ 30.2%
Gross profit	137.9	116.8	+ 18.1%
Gross profit margin	35.9%	39.6%	- 3.7%-Points
EBIT	54.3	47.4	+ 14.6%
EBIT margin	14.1%	16.1%	- 2.0%-Points
Earnings after taxes (continuing operations)	39.8	35.4	+12.4%
Net profit¹	36.4	93.8	-
EPS basic (in €, continuing operations)	2.08	1.85	+12.4%
Cash and cash equivalents	94.4	136.1	-30.6%
Net cash	43,9	122,3	- 64.1%
Free cash flow (continuing operations)	-28.2	24.2	-
Free cash flow total¹	-31.5	94.3	-
Capital Expenditures	17.8	5.5	+ 223.6%
Employees as of September 30	1,528	1,414	+ 8.1%

¹ including discontinued operations, i.e. MicroOptics business

- Order book at €276.1 million, of which €140 million (only tools) are scheduled for delivery and revenue recognition in 2026
- Significant decline in net cash, mainly due to the deduction of the lease agreement for our new production site in Zhubei (Taiwan) and investments as well lower customer pre-payments due to reduced orders
- Free cash flow after three quarters at €-28.2 million; Q3 without noticeable change with free cash flow of €-0.7 million and operating cash flow of €+5.9 million
- Increase in CapEx to €17.8 after three quarters driven by new production site in Zhubei

In Q3, business volume declined as expected compared with previous quarters, accompanied by high margin pressure

Sales volume remains very solid, but margin pressure has increased further while order intake momentum continued to be muted.

Sales guidance confirmed for the full year 2025, reduced margin forecasts

Guidance 2025

(as of October 27, 2025)

- Based on the disappointing margin development in the third quarter of 2025, we informed the capital markets on October 27, 2025, that we had to revise our guidance for the gross profit margin and EBIT margin for the full year 2025 downward again. Strict cost management for the remainder of the year should ensure that the reduced margin targets are achieved.
- The Management Board will also discuss appropriate measures for sustainably improving the cost structure in the near future.

Market outlook and Ambition 2030

**Today's tech trends,
accelerated by AI, are
built on semiconductors**
Fueling rapid growth across the
semiconductor ecosystem

Trend Selection – not exhaustive

AI-led secular trends are driving semiconductors toward a \$1 trillion market by 2030

Semiconductor device revenue forecast (€bn) & key growth driver

¹ Based on USD values
Source: SUSS Research; market size based on Yole (2025); Note: USD/EUR forward exchange rate = 1.18, USD/EUR 2024 exchange rate = 1.08, Trend Selection – not exhaustive

Market segment	Growth-drivers
Computing & Data Storage	AI (Generative-, Agentic-, Physical-AI) Autonomous driving Industrial Automation / Internet of Things Metaverse (AR/VR) Key growth driver
Communications	Hyperconnectivity – 6G
Automotive	Software-Defined Vehicles / Autonom. driving Automotive Electrification
Industrial	Industrial Automation / Internet of Things Electrification / Green power generation
Consumer	Metaverse (AR/VR) Healthcare Wearables

Rising application requirements are blurring the lines between Frontend & Backend territories – addressed in our Business Unit strategy

Serviceable market is expected to grow by ~7% per annum through 2030

Serviceable Available Market (Revenue in €M)

¹ MEMS, Power, CIS & Advanced Packaging market reflected; ² Only Backend Coating market; Inkjet: Upside from expanding into additive manufacturing not reflected | Source: SUSS Research, primarily based on Yole

Photomask Equipment

- **High-End mask market leading growth**
- Mid-End mask market growing mid-to high single digits annually

Wafer Cleaning

- **Market entry with MEMS, Power & CMOS Image Sensors**; Expansion into Advanced Packaging with 300 mm tool planned (tool launch in 2027)
- Memory – future upside (not in market size reflected)

Bonding

- **Temporary Bonding will continue to grow** especially driven by high demand for AI
- **Hybrid Bonding with strong growth** ahead driven by advanced Logic & Memory

Coating

- **Advanced Packaging drives growth** in Backend Coating segment
- **Inkjet offers upside beyond traditional coating**, expanding into additive manufacturing

Imaging

- **Advanced Packaging fuels growth**; larger reticle-size dies supports adoption of full-field projection scanning

SUSS long term ambitions for 2030

Upcoming new product introductions – initiating next growth phase

Photomask Solutions

Advanced Backend Solutions

More diversified regional growth – with normalizing China share

SUSS – a valued partner in the semi ecosystem – Working alongside leading chip companies, as well as key research and industrial partners

We have expanded our global standing and have become a valued part of the semi ecosystem.

Our key success factors are:

- Focusing on market leaders
- Engaging into commercial and technology partnerships
- Creating customer intimacy through joint process development and key account management
- Local presence with highly qualified customer service and application support

Foundries and OSATs

Integrated Device Manufacturers (IDMs)

Technology and material partners

Academia, consortia and institutes

¹ 3DIC Advanced Manufacturing Alliance

Group growth based on strong evolving portfolio, new product introductions, and a strengthened service business

Revenue development (in €M)

Current portfolio – key revenue drivers:

- Photomask Equipment** Remain #1 in high-end segment and expand leadership into mid-end segment
- Temporary Bonding** Sustaining leadership – especially in the HBM market segment
- UV-Scanner** Expand footprint in Advanced Packaging, leveraging strong position at the #1 foundry

New equipment – key revenue drivers :

- Wafer Cleaning** Enter the Wafer cleaning market with an innovative, cost-efficient & green solution
- Hybrid Bonding** Entry into Advanced Logic and HBM market, enabled by excellent technological performance
- Inkjet Coating** Shaping Inkjet market – a cost-efficient Coating solution and enabler for Additive Manufacturing

Service – key revenue drivers:

Growing Service revenue share from 18% to 25%, with Service now a strategic business contributor

Growth path underpinned by AI-driven market tailwind and continued expansion into new segments

 **SUSS**
2025 - 2030

9 – 13% sales
growth p.a.

=

1) Wafer Cleaning & Hybrid Bonding

Active pursuit of inorganic growth – we have the means and are looking for the right fit

Revenue development (in €M)

Strategically enhancement of existing portfolio

- Acquisition must support existing strategic priorities, not merely broaden the portfolio
- Acquisition should not structurally dilute our margin
- Carve out and integration efforts need to be manageable – culturally, operationally, and organizationally

Acquisition of Know-How to accelerate product development

- In-house development not feasible, or significant time savings achievable through acquisition
- Clear path to monetization must be visible

Balanced margin expansion driven by the existing portfolio, new equipment platforms, and service

Gross profit margin development (in %)

1) Wafer Cleaning, Hybrid Bonding & Inkjet

Current (evolving) portfolio:

- New modular & standardized product generations (e.g. new Mask Cleaner, UV-Scanner & Mask Aligner)
- Optimized production network & further improved capacity utilization

New equipment:

New products with higher margins than the current portfolio due to new equipment design (exception: Hybrid Bonder, where the die-bonding module is sourced externally)

Service:

Overall margin improvement through more strategic installed base management and focused service product portfolio

EBIT margin to benefit from higher business volume while increased R&D spend is covered by decline of SG&A expense ratio

How to achieve the targeted EBIT margin of 20 – 22%

Benefiting from increase in gross profit

Gross profit has the potential to ~ **double** from 2024 to 2030, driven by larger business volume with improved profitability

¹ Gross profit is calculated based on the mid-point of the 2030 sales ambition.

Reduced SG&A expense ratio projected

- **R&D expense ratio** is expected to increase to support sales growth
- **SG&A expense ratio** is expected to decrease by ~ 2 to 3 %-points due to below-average increase in selling costs and admin functions

■ R&D expense ratio
■ SG&A expense ratio

Our ambition is to take SUSS to a new financial level by 2030

	FY 2024	FY 2030A
Sales	€446.1 million	€750 – 900 million
Sales growth	46.6% (YoY)	9 to 13% (CAGR 2025 – 2030A ¹)
Gross profit margin (in %)	40%	43 to 45%
SG&A (in % of sales)	13.8%	~11 to 12%
R&D (in % of sales)	9.0%	~11%
EBIT margin (in %)	16.8%	20 to 22%
Free Cashflow	€25.3 million	~ €90 million
ROCE	36.8%	39 to 41%
CapEx	€7.6 million	~ €22 million (annual ø 2026 – 2030)
Tax rate	33.1%	~28% ²

¹ The CAGR calculation is based on the midpoint of the 2025 sales forecast, i.e., € 490 million; ² The internal planning assumption for the tax rate is generally ~ 28%.
