Information on relevant knowledge, skills and experience

Dr. David Dean is an experienced management consultant and supervisory board member. For more than 30 years, Dr. Dean has successfully worked at the executive level with global technology companies on their strategy and business development. Between 1994 and 2013, Dr. Dean was a partner (from 2002 as Senior Partner) in the Technology & Telecoms practice of Boston Consulting Group and held worldwide responsibility for this business between 2000 and 2006. His work with leading technology companies included innovation topics, organization, and operational efficiency issues. Dr. Dean has a profound understanding of technology thanks to his education in physics. Today, he shares his broad experience as an independent consultant and as a member of supervisory or advisory board of companies. As a member of various advisory and supervisory boards, e.g. at the Axiata Group, a telecommunications company operating in South and South-East Asia, or at the Kaiteki Institute of Mitsubishi Chemical Holding, Dr. Dean deals with strategic issues as well as sustainable value creation under challenging economic conditions. Dr. Dean is fluent in both German and English.
